 - 1* 14/23cm cloth (Optional – different color)
 - Pillow filling material
 - Electrical Circuit (Speaker+Battery+Controller)
-
- Printer
 - Optionally 3D Printer
 - Optionally Sewing Machine

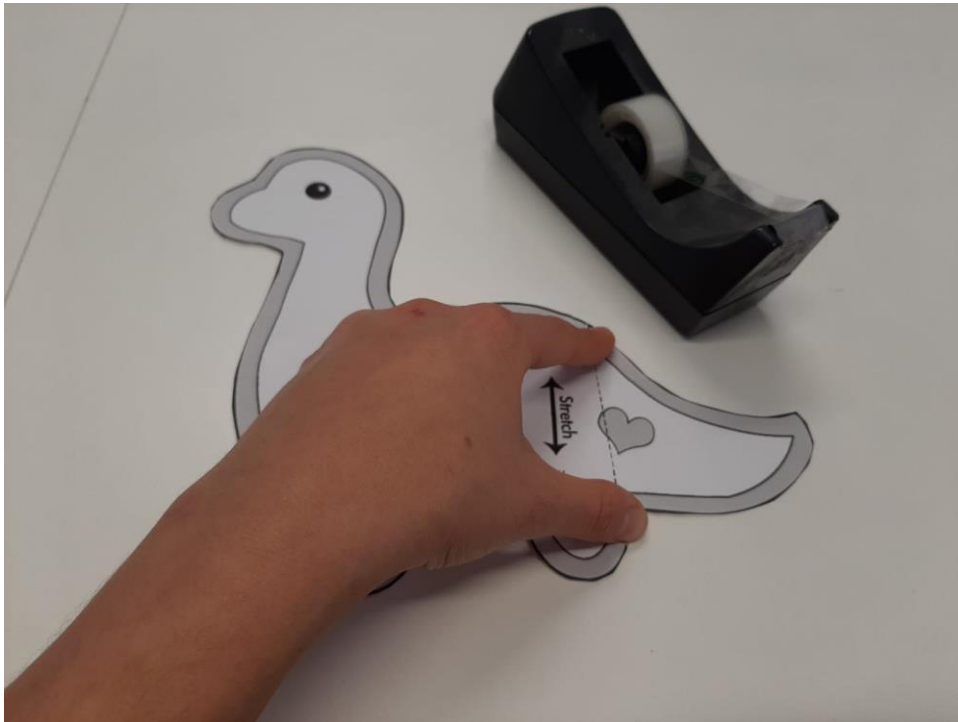

Print the papers

Cut the papers

Tape A+B together according to the corners

Cut the stuffed doll's shape

Make sure to work on the fabrics inner side
mark the outline + cut

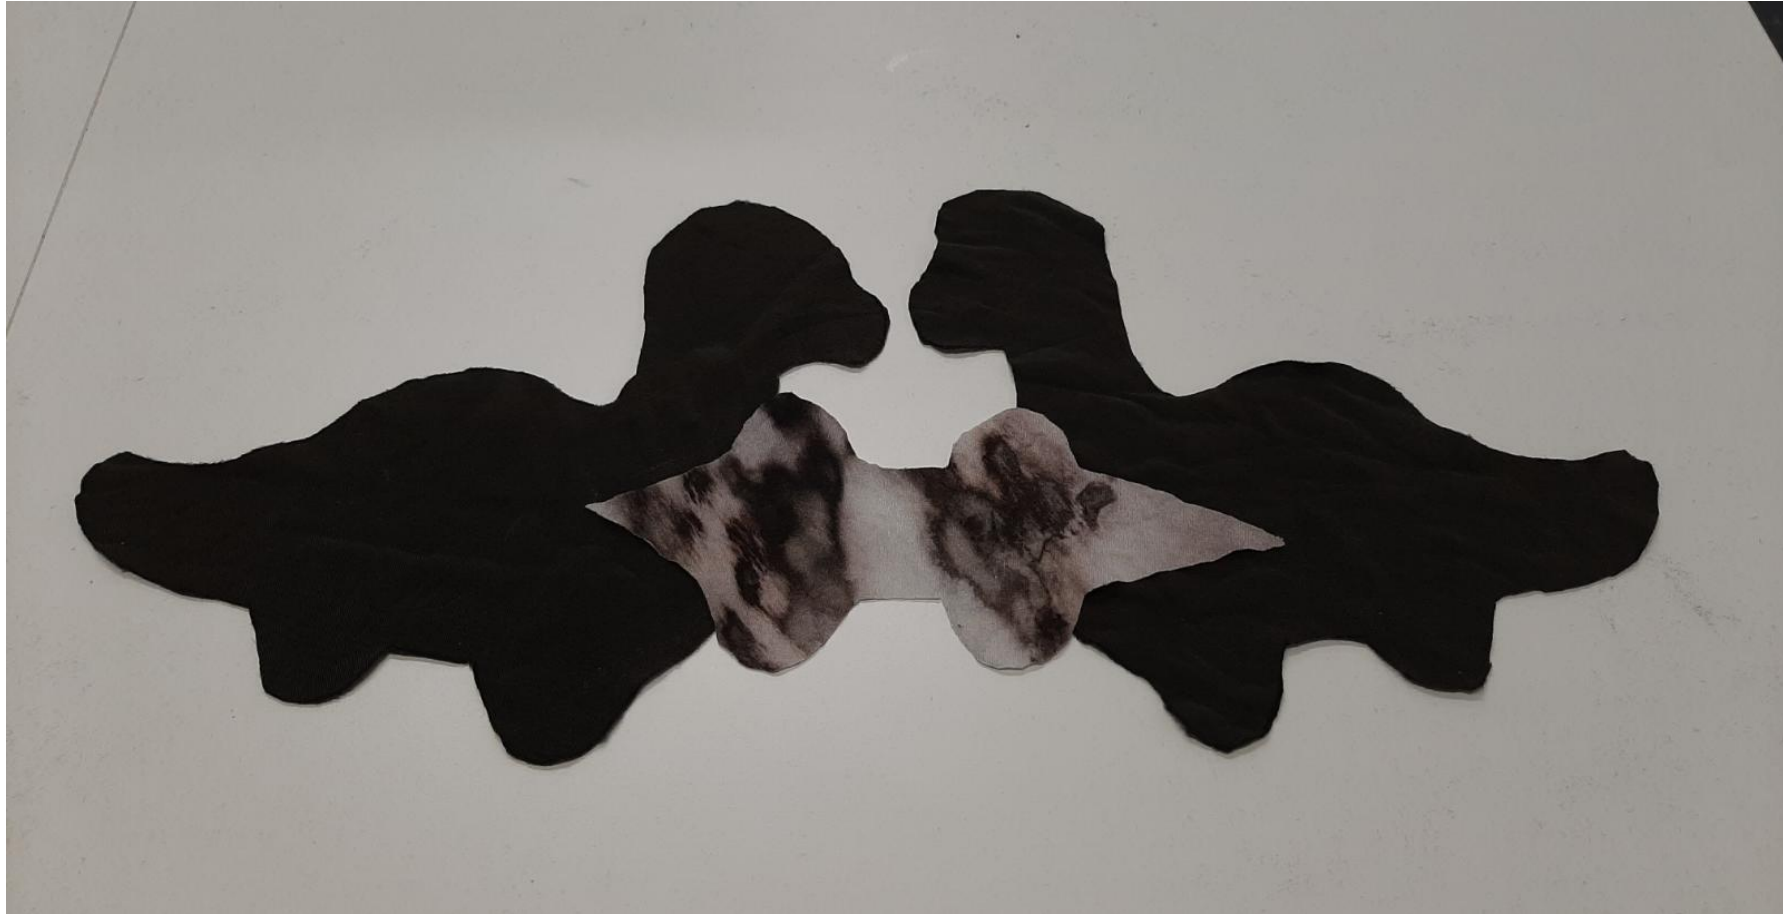

For the other outline flip the Dino over

Place and mark the belly's outline on the 2nd fabric

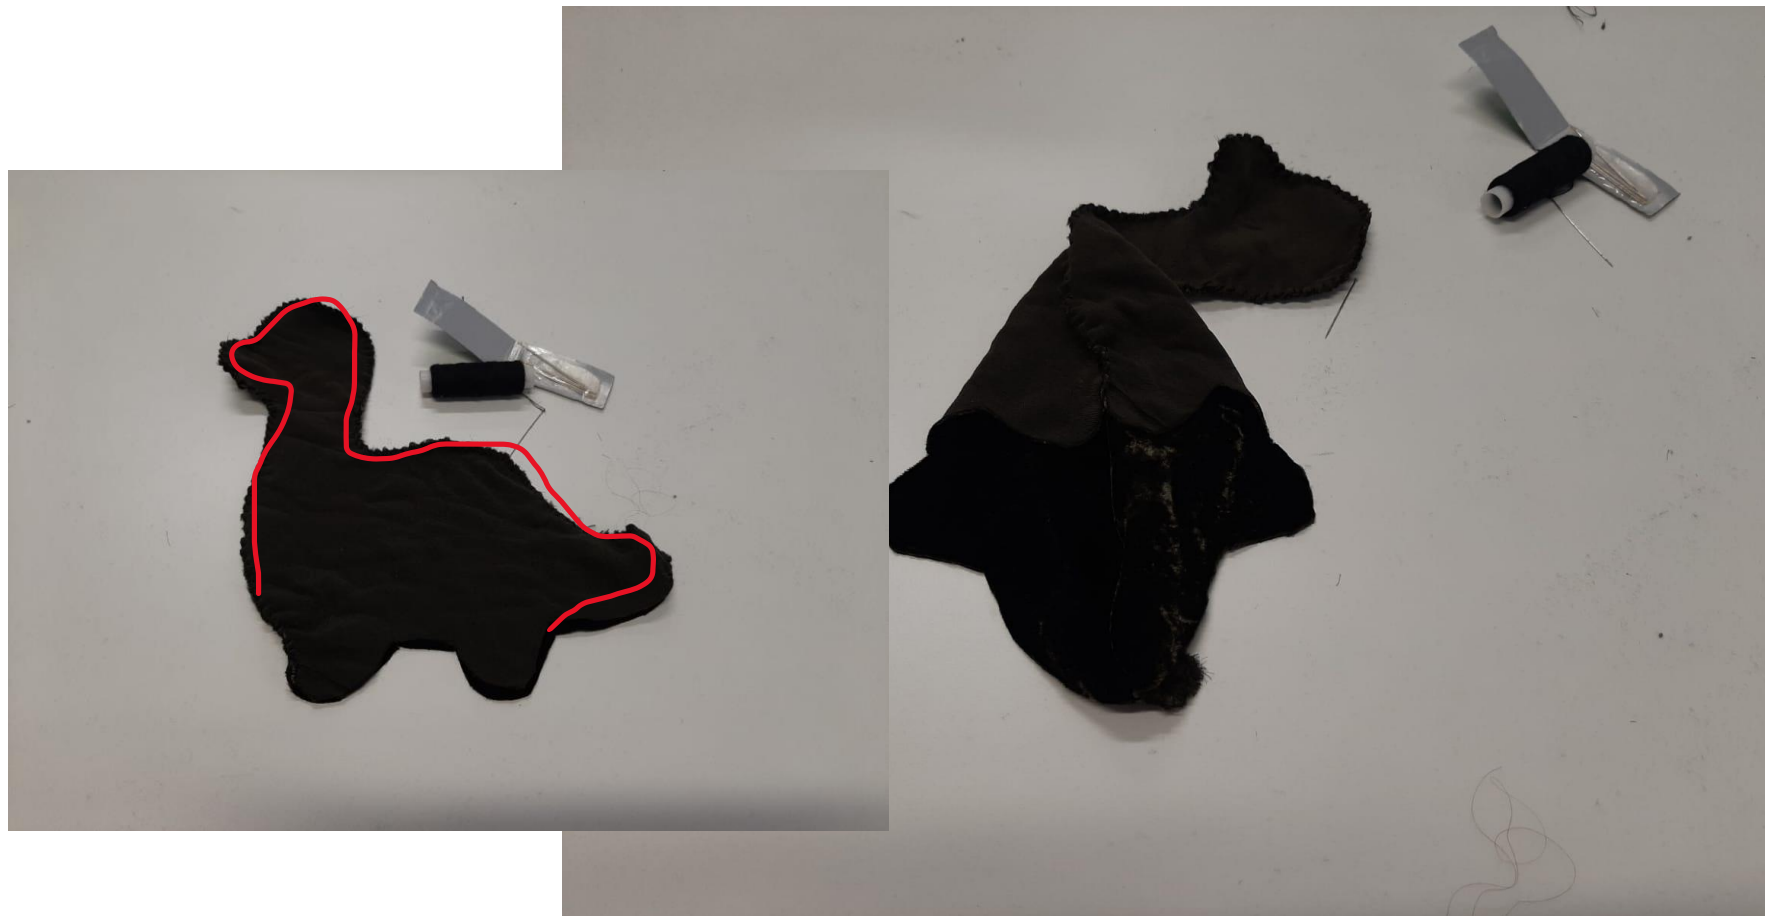

Cut the fabrics

Place them on top of each other “inside-out”.
Place marker pins from the dino’s chest to the tail

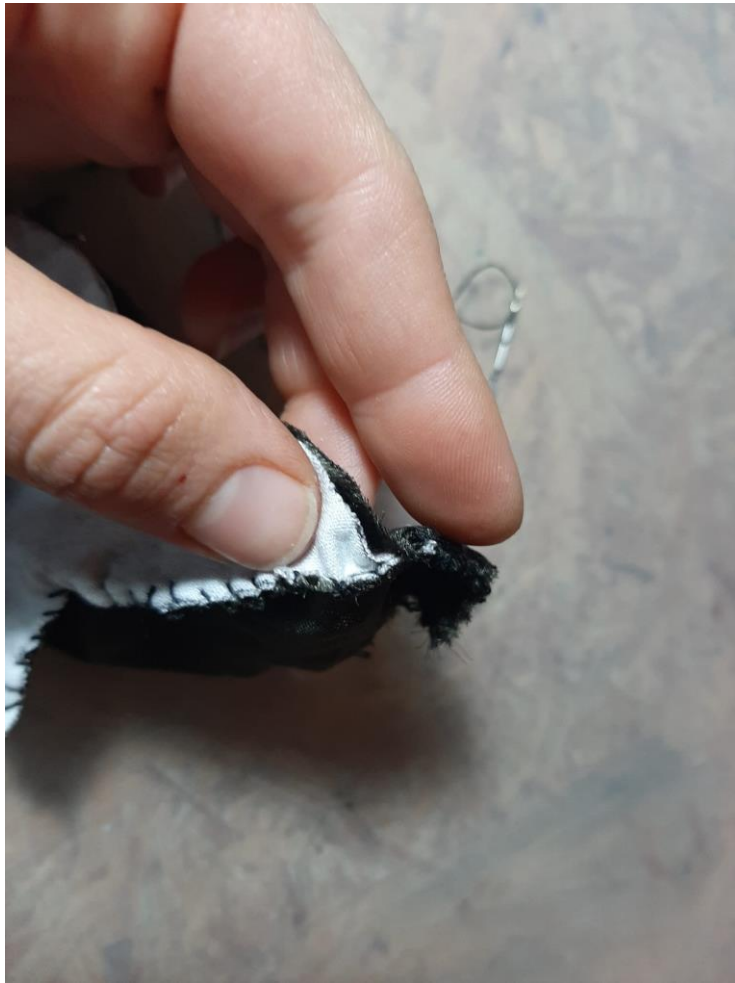

Sew according to the pins and marked line

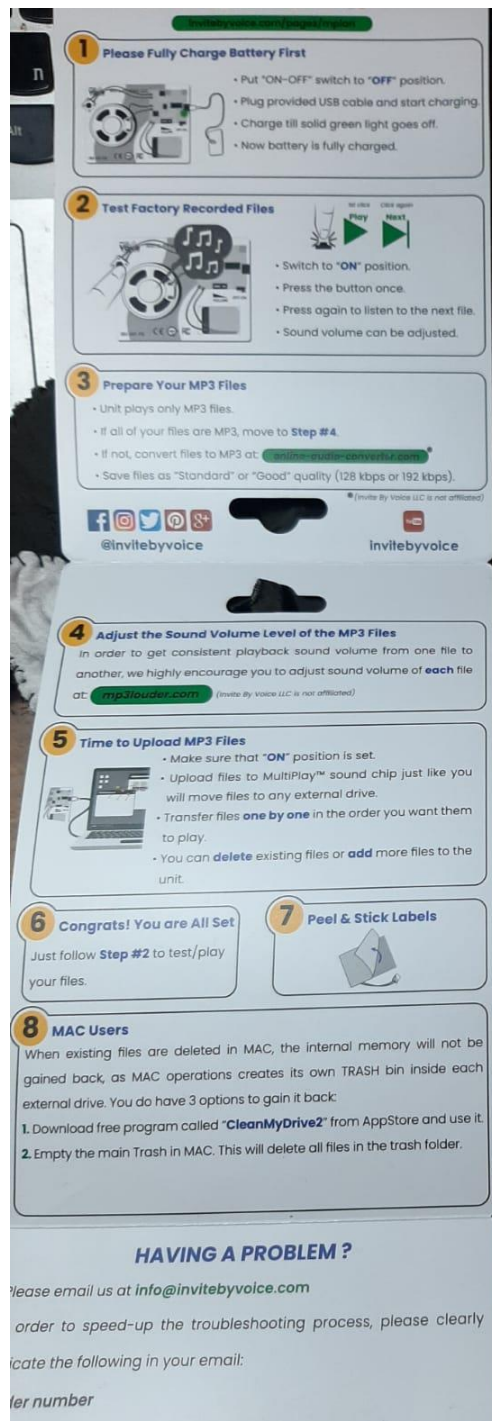

Now the same with the belly piece

Important! Make sure to seal the corner stitches –
Then flip inside-out through the belly's hole

Carefully unseal the circuit by cutting along the side of the circuit

plug to the computer – follow the manual

keep the sealing plastic

- Cut two 3.5cm by 1.5cm plastic strips
- Glue to the button

Cut out the circuit's plastic cover from the case

Place the circuit inside, fold and cut out access for cable connection and volume control (marked in red)

Make sure the controller is switch to ON

Attach the corners

Now to stuff the doll

- Start with the head and Neck Areas

Insert the electrical circuit

- Place the button around the tail
- Align the speaker with the middle of the dino

Keep on stuffing

Keep sewing to the right foot

Glue the cable to the edge of the foot
Add filling + Finish sewing

And DECORATE!
